

ISCED Education Levels Used for Enroll-HD

Version 2022-06-24

Enroll-HD

A worldwide observational study for Huntington's disease families

A CHDI Foundation Project

Enroll-HD has adopted the International Standard Classification of Education (ISCED) codes developed by the United Nations Educational, Scientific and Cultural Organization (UNESCO) to classify education level. The ISCED codes have been established according to uniform and internationally agreed definitions and allow comparison of education level across countries.

For Enroll-HD, each country has a tabulated summary of how its education system maps onto each ISCED code (available in native language only). The ISCED zip file that accompanies the Enroll-HD periodic dataset includes a document for each country's ISCED mapping. These documents are intended to assist researchers in interpreting the ISCED codes.

Revision History

Version	Summary of changes
2015-01-R1	Initial version for the first Enroll-HD periodic dataset
2015-10-R1	Revised version for the second Enroll-HD periodic dataset
2016-10-R1	Revised version for the third Enroll-HD Plus periodic dataset
2022-06-24	Revised version to include additional countries
